# Project Title

# Team Name

1. Name1
2. Name 2
3. Name 3

# Introduction

---

introduction to the project.

Why was this project chosen?

Background of the problem.

Example:

[The Online Food Delivery System is a web application that enables customers to order food online while allowing restaurants to manage orders efficiently. ]

# Problem Statement

Clearly explain the existing problem.

Example:

[Manual process is time-consuming.

Data is not managed efficiently.

Lack of online accessibility.

High chances of human errors.]

# Objectives

Mention 4–6 objectives.

Example:

- Develop a user-friendly application.
  - Automate manual tasks.
  - Reduce processing time.
  - Improve data accuracy.
  - Provide secure login.
  - Generate reports.
-

# Existing System

## Existing System

- Manual records
- Paper-based process
- No online access

## Limitation

- Manual records
- Paper-based process
- No online access

# Technologies used

## Components

Frontend

Backend

Database

IDE

Server

## Technology

HTML, CSS, JAVASCRIPT

PHP / Python / Java

MySQL

VS code

XAMPP

# Flow of project

—

diagram

# Main logic

---

## CODE SCREENSHOTS

# Future Scope

---

## Example:

- Mobile application
- AI integration
- Cloud deployment
- Online payment gateway
- Multi-language support

---

Thank you
